LinkedIn: [Malik Tabi Mohammed | LinkedIn](#)

Objective

- Recent Computer Science final-year student seeking an entry-level Software Developer position to apply strong programming and problem-solving skills in a fast-paced tech environment. Passionate about building user-centric solutions and contributing to effective customer service operations, including client inquiries and engagement, data entry and accurate record management for daily banking operations.

KEY SKILLS

- **Backend Development:** Python, Django, API Integration, Server Log Analysis
- **Frontend Development:** React.js, HTML/CSS
- **UX/UI Design:** Figma, Wireframing, Responsive Layouts
- **Data Analysis:** Python, Excel, Interactive Dashboards
- **Other:** Database Management (CRUD), Authentication/Authorization Controls, Client Engagement

Work Experience

- Intern – Agricultural Development Bank (ADB)

Kasoa Branch, New Market Road, Ghana

August 1, 2024 – September 7, 2024

- Supported customer service activities, including client inquiries and engagement
- Performed data entry and accurate record management for daily banking operations
- Assisted with data verification and reporting for internal audits and account tracking
- Collaborated with banking staff to ensure smooth branch workflow and client satisfaction

National Service Personnel (Back End Developer / UX)

Prudential Bank Ghana, RRC Accra | January 2026 – October 2026t

- Develop, maintain, and troubleshoot backend APIs, facilitating secure data integrations between core banking systems and third-party payment gateways.
- Analyze server logs to systematically diagnose and resolve complex backend transaction failures, ensuring system reliability and seamless data flow.
- Enhance system security and performance by refactoring user authorization mechanisms, active session management, and role-based access controls using Django.
- Provide UX/UI design support and utilize data analysis techniques to drive operational efficiency and improve internal reporting.

Education

BSc. Computer Science *Central University – Miotso Campus, Tema Community 25, Ghana*

- Graduated: November 2025
- Studied core computer science principles including software engineering, data structures, and algorithms.

Projects

- Website: Showcase of UI/UX design, responsive layout, and interactive components

<https://www.figma.com/design/YHo3vLTketDGFnCXSaABGk/Home-care?node-id=0-1&t=tnthSROnX7XVRHnh-1>

<https://www.figma.com/design/TQZ34KHcCXbM8QyxEj6LUm/Food-ordering-app?node-id=0%3A1&t=FDaeXdDMYNqIhQEh-1>

- A dynamic, responsive front-end web application built entirely with **React.js** to deliver a fast and interactive user experience.

<https://tastychef.vercel.app/>

- Client Management App: A simple CRUD-based application built during university coursework

<https://configare.wordpress.com/store-page-2/>

XFlow Expense Tracker: A comprehensive financial dashboard built with React.js, Python, Django, and APIs that simplifies complex personal budgeting by visualizing income versus expenses in real-time.

(Live: <https://xflowexpensetracker.vercel.app>)

Slot Booking Platform: Complete Figma UI/UX design for a university hostel and apartment rental search platform.
